General info

Solid Hardwood Nightstand

Modular design solid hardwood nightstand with one drawer and one shelf is available in 3 colors. This is our 1826 model.

The naming of our case goods is basically the combination of width and height of the piece. For example, if the width is 18" and height is 26", then we call it the 1826 model. Usually all case goods are 18" deep.

And what is a [casegood](#) anyway? Any boxy looking piece of furniture with doors or drawers for storage such as nightstand, dresser, or even bookcase we call them Casegoods.

This nightstand is part of our [Modular Collection](#) ecosystem. All case goods in this collection are matching in design and style.

You can use our modular design nightstand for kids, teens and adults and at home or in commercial settings such as BnB.

Made of either birch, maple, or aspen premium knot-free solid [hardwood](#), factory select. Solid hardwood furniture is sturdy, easy to maintain, and holds its value.

Usability

Nightstand, [night table](#) or bedside table is a small table like cabinet that goes beside the bed with

one or more drawers, shelf and sometimes door.

This particular model has a very small footprint, at only 18" wide, to fit any tight space and still look elegant.

You can use this nightstand beside our platform beds and bunk bed or place it under the loft bed. Also you can use it independently with your existing bed, or pair it up with other collections we have, or match it with pieces from Modular Collection.

Safety

We add a securing device to all casegoods in our Modular Collection line up come so to prevent tipping. That is, you install this device to the wall and connect it to your nightstand so your unit would not fall accidentally on your child.

Drawers have safety pins to prevent you accidentally pulling the drawer out. If you should need to take out the drawer completely, you need to release the pins first and they are hidden under each drawer.

Drawers

We use soft close for drawer(s) in our Modular Collection casegoods. Soft close is a nice feature to have as it adds to longevity of your unit as well as adding to pleasure of using it.

Drawers are all using [dovetail joints](#) for maximum strength and durability.

There are no visible metal rollers for opening and closing the drawers since we use a hidden mechanism for cleaner look.

Knobs on each drawer are also solid wood and in matching color. If you wish to opt for a different look, we do offer a nice collection of them. See our [knobs collection](#).

Assembly

Assembly of Modular Design nightstand happens in our factory and therefore you do not need to assemble anything except attaching the knob(s). By assembling your nightstand at our factory, we ensure the sturdiness of your casegood since we can use stronger joinery as opposed to DIY assembly at home.

Summary:

- Part of our Modular Design collection.
- The design allows you to modify your furniture as your need evolves.
- Made from knot-free premium solid hardwood.
- Matches to all other case goods in this collection.
- You do not need to assemble this unit.
- Non-toxic low VOC finish.
