General info

Solid Hardwood Trundle Bed

Modular design solid hardwood trundle bed is available in 2 sizes and 3 colors.

This trundle bed is part of our [Modular Collection](#) ecosystem. The name is for the fact that each item is made of many building blocks so you have a lot of choices.

You can use our modular design trundle bed for kids, teens and adults and at home or in commercial settings such as BnB.

Made of either birch, maple, or aspen premium knot-free solid [hardwood](#), factory select. Solid hardwood furniture is sturdy, easy to maintain, and holds its value.

Usability

There are 4 sturdy wheels under this unit so to make it very smooth rolling in and out.

Adaptability is part of its design. You can put this trundle bed under all daybeds, platform beds and bunk beds within our Modular Collection system.

Also you can access this unit from both sides of your bed, that is, if your bed is in the middle of the room for example, you can access it from either side. You will appreciate this function a little more if you turn your trundle-bed to a storage unit.

Modular means just that. With adding one module, [Trundle-Drawer-Kit](#), you can easily turn your trundlebed to underbed storage.

Mattress

Standard size mattress fits very snugly since there are two boards on either end. We recommend to use our 6" thick mattresses as they are foam and therefore flexible and are at proper height.

Slats

[Slats](#) are made of knotty solid pine wood. Each slat is 2.5" wide and 2.5" apart from each other for a total of 14 slats for single size. End slats are 4.7" each.

Assembly

Assembly is fairly simple. There are 4 sides you need to connect, screw in the wheels and slats and start using your trundle bed.

Summary:

- Part of our Modular Design collection.
- The design allows you to modify your furniture as your need evolves.
- Made from knot-free premium solid hardwood.
- Fits under daybeds, bed frames and bunk beds.
- Non-toxic low VOC finish.
