General info

Solid Hardwood Loft Bed

Modular design solid hardwood loft bed with stairs and curtains and tent is available in 2 heights, three wood colors, three styles of headboards, and single (twin) size plus many colors of curtains and tent to choose from.

This loft bed is part of our [Modular Collection](#). The name is for the fact that loft is made of many building blocks which give you a lot of choices.

The modular design means you have zillions of options before your purchase and lots of possibilities in the future. This is because you can obtain parts and convert your loft to something else, say to two loft beds for example. This is our only collection which we sell as a whole or by pieces.

You can use our modular design loft beds for kids, teens and adults.

Made of either birch, maple, or aspen premium knot free solid [hardwood](#). You can not choose your wood type, the factory does it

Usability

This loft divides into one individual bed or a daybed, but since one of the headboards has an opening

for the ladder, you may want to get another style of headboard if you wish to have a proper looking bed frame.

As your child grows, you can remove the curtains and add a desk and bookcase under this loft.

Curtains

Price of this item includes two [Curtains](#). One piece covers the front of your loft, and the other piece covers one corner. Curtains connect to the frame with simple velcro. You can easily take them off, wash, and put them back on. Windows are see-through plastic types of material.

Tent

Price also includes the top tent and it is available in matching colors as the curtains. [Top tent](#) structure is the same wood as your loft bed frame and in the same color as your loft. You can easily remove the fabrics for wash and reinstall.

Stairs

This bunk comes with four stairs and each stair has a drawer in it. Lower drawers do not go all the way to the end. Upper two drawers do. Each drawer is equipped with a soft close mechanism and dovetail joinery.

A beautiful and sturdy bannister and a vanity panel are on each flank of stairs.

Stairs can go to either right or left side.

Slats

[Slats](#) are made of knotty solid pine wood. Each slat is 2.5" wide and 2.5" apart from each other for a total of 14 slats for single size. End slats are 4.7" each.

Assembly

Assembly of Modular Design loft with stairs is reasonably simple. No need to assemble the headboards or stairs. Stairs come in two pieces. Lower three stairs are one piece and one upper stair is another piece.

You need to assemble the stairs, the guard rails, connect mattress rails, and slats.

Safety

This solid hardwood loft bed has a rating of 400 lb weight on the upper deck. In our factory we put 800 lb weight on this loft and it holded nicely - though we recommend it to stay within the range of actual rating.

There are 4 metal pings, purpose built Rocklocks, which locks the upper headboards to lower legs so you can not pull the legs out accidently.

Mattress

Standard size mattress fits this loft bed just fine. We recommend using a six inches thick mattress. For extra long versions, you do need an extra long size mattress and bed sheets which are readily available.
