

Solid Hardwood Bunk Bed w Vertical Ladder - Modular Design - Panel - 61" H - Twin XL over Twin XL - Natural

MX-HOTSHOTXL-P-N

\$2768

Plus tax and shipping

General info

This solid hardwood bunk bed is part of our [Modular Design](#) collection. It comes with a vertical ladder you can install on the left or right hand side.

Size of this bunk bed is Twin extra long over Twin extra long. Twin is the same as single. Twin XL has the same length as queen size.

Color, or stain, is in Natural finish so it gives the look and feel of real wood.

Headboard is Panel style for a cozier look and feel.

The overall height is 61 inches which is on the short side of the spectrum. You can split this bunk bed into two beds. All four headboards are at equal heights at 31" each so, this means you will end up with technically two identical daybeds if you choose to split the bunk.

Usability

This modular design gives you zillions of options of use and lots of possibilities in the future. This is because you can purchase pieces individually which in turn gives you lots of flexibility.

Our modular design solid hardwood bunk bed is suitable for use by kids, teens or adults.

You can divide this bunk bed into two separate beds.

We use solid [hardwood](#) for this bunk bed. Our factory uses Aspen, Maple, or Birch wood interchangeably for the production of this unit. To achieve maximum strength, we use premium knot-free hardwood for this bunk bed.

Slats are made of [plywood](#). They are about 2.5" wide and 2.5" apart from each other. Each slat comes with holes. So, you can secure every slat to the frame with two wood screws.

Under Bed Storage

You can add a storage trundle under this bunk bed, or normal trundle bed for allowing an extra mattress. Also you can add an under bed dresser or a set of two drawers. These items are independent units so you can add them later on if you choose to.

Safety of Your Bunk Bed

This modular design solid wood bunk bed can hold a tested 400lb weight capacity on the upper deck. The lower deck can almost also hold the same weight, but we do not test the lower deck.

All sizes have a center support on upper deck, except for the Twin. For lower deck, all XL and Queen size come with center support as well.

Our modular design has 4 metal pins, purpose built [Rocklocks](#) which lock the upper and lower headboards.

We use acrylic paint for the white finish. For natural and chestnut finishes we use nc lacquer (nitro cellulose). Also, we test the finishes for chemical compliance with US and EU safety standards.

Ladder

You can install this ladder on either the left or right-hand side of your bunk bed to suit your space. Ladder is vertical for this bunk bed. Vertical ladder is harder to climb than the angle ladder but takes less space. If you plan to use a trundle bed or underbed storage, a vertical ladder is going to work better.

The ladder is thick and sturdy. It has anti-slip grooves and each rung is almost 3" wide.

Assembly

Assembly of the Modular design is relatively easy as you do not need to assemble the headboards. The only items you need to assemble are the ladder, guard rails, connect mattress rails, Rocklock and slats. However, installing the Rocklock is tricky.

Mattress

A standard size mattress fits this bunk bed just fine. You can use a maximum of 6" thick mattress for the upper bunk. For the lower bunk, depending on which height you choose, you can use a mattress that is between 6" to 8" thick.

Summary:

- Part of our Modular Design collection. The design allows you to modify your furniture as your needs evolve.
- Made from knot free premium solid hardwood.
- Converts into 2 standard beds.
- Install the ladder on the left or right side.
- Plywood slats.
- Non-toxic low VOC finish.

- Add under bed storage to maximize space saving
