General info

Hardwood Bunk Bed with Stairs and Slide

This hardwood bunk bed with stairs and slide is part of our [Modular Design](#) collection. The name is because of the fact that it is made of many building blocks which give you a lot of choices.

Headboard is Panel style for a cozier look and feel.

Color, or stain, is in Chestnut finish and you can see the wood grains as well. Chestnut color is reddish in tone and is a traditional finish.

The overall height is 61 inches which is on the short side of the spectrum. You can split this bunk bed into two beds. All four headboards are at equal heights at 31" each so, this means you will end up with technically two identical daybeds if you choose to split the bunk.

Size of this bunk bed is Twin extra long over Twin extra long. Twin is the same as single. Twin XL has the same length as Queen size.

Usability

The modular design means you have zillions of options of use and lots of possibilities in the future. This is because you can purchase pieces individually which in turn gives you lots of flexibility.

Our modular design hardwood bunk bed with stairs is suitable for use by kids, teens or adults.

Also, you can divide this bunk bed into two separate beds.

The lower bed is interchangeable with many options, you can install it in L-shape format or Parallel. Parallel bunk bed is great for under A-Frame or even under stairs or where you have rooms with different level ceiling heights. The L-Shape bunk bed feels more open if you compare it to standard bunk for the same height. For low ceiling rooms where you must choose a low bunk, L-Shape is a very useful option.

Solid Wood Frame

We use solid [hardwood](#) for this bunk bed. Our factory uses Aspen, Maple, or Birch wood interchangeably for the production of this unit. To achieve maximum strength, we use premium knot-free hardwood for this bunk bed.

Its slats are made of [plywood](#). They are about 2.5" wide and 2.5" apart from each other. Each slat comes with holes. So, you can secure every slat to the frame with two wood screws.

Under Bed Storage

There are a variety of under-bed storage solutions for this collection. You can add a storage trundle, or an under-bed dresser. Alternatively, you can add two independent and large roll-in-out drawers under this bunk bed.

Safety

This modular design hardwood bunk bed can hold a tested 400lb weight capacity on the upper deck. The lower deck can almost also hold the same weight, but we do not test the lower deck.

All sizes have center support on the upper deck except for the twin. For the lower deck, the center support is available only for XL sizes and Queen sizes.

The modular design has 4 metal pings, purpose built [Rocklocks](#) which lock the upper and lower headboards.

We use acrylic paint for the white finish. For natural and chestnut finishes we use nc lacquer (nitro cellulose). Also, we test the finishes for chemical compliance with US and EU safety standards.

Stairs

This hardwood bunk bed comes with four stairs and each stair has a drawer in it. Drawers are also wood, soft-close feature plus with dove-tailed joinery. Lower drawers do not go all the way to the end, only the upper two drawers do.

Also, this staircase comes with a solid banister for additional safety and ease when climbing.

Slide

This slide is made of solid hardwood and MDF surface for easy sliding. It comes with two hooks which hook to the mattress rails and these make it easy to remove the slide as and when you want. You can secure these hooks to the mattress rail using screws. For extra safety and to secure the slide, we have extra safety pieces which go over the hooks so that you do not remove the slide accidentally.

You can install this slide on the left or right side.

Assembly

Assembly of this Modular Design hardwood bunk bed with stairs and slide is reasonably simple. No need to assemble the headboards. You need to assemble the stairs, the guard rails, connect mattress rails, connect the slide and slats.

Stairs come in two pieces. Lower three stairs are one piece and one upper stair is another piece. Stairs and the slide can go to either the right or left side.

Mattress

Standard size mattress fits this bunk bed just fine. For the upper bunk, you can use a maximum 6" thick mattress. For the lower bunk, since the overall height of the bunk is low, we recommend that you choose one of our 6" thick mattresses.

Summary:

- Modular Design allows you to modify your furniture as your need evolves.
- Made from knot-free premium solid hardwood.
- Converts into two beds or loft with additional pieces.
- Includes staircase, guard rails, slats and slide.
- Install the stairs or slide on the left or right side.
- Solid wood slats.
- Non-toxic low VOC finish.
- Add under bed storage to maximize space saving.
