General info

This Modular design hardwood bunk bed with Sliding Platform is part of our [Modular Design](#) collection. The name is because of the fact that it is made of many building blocks which give you a lot of choices.

Headboard is Slatted style and it is a contemporary take on the traditional mission design.

Color, or stain, is in Chestnut finish and you can see the wood grains as well. Chestnut color is reddish in tone and is a traditional finish.

The overall height is 61 inches which is on the short side of the spectrum. You can split this bunk bed into two beds. All four headboards are at equal heights at 31" each so, this means you will end up with technically two identical daybeds if you choose to split the bunk.

Size of this bunk bed is Twin extra long over Twin extra long. Twin is the same as single. Twin XL has the same length as Queen size.

Usability

The modular design means you have zillions of options before your purchase and lots of possibilities in the future. This is because you can purchase parts separately that you can use to convert your

bunk into something else. You can also use this sliding platform with or without the slide and therefore use it for a very long time.

You can use our modular design hardwood bunk bed for kids, teens or adults. It is also suitable for commercial use in your BnB or rental property.

Solid Wood Frame

We use solid [hardwood](#) for this bunk bed. Our factory uses Aspen, Maple, or Birch wood interchangeably for the production of this unit. To achieve maximum strength, we use premium knot-free hardwood for this bunk bed.

Its slats are made of [plywood](#). They are about 2.5" wide and 2.5" apart from each other. Each slat comes with holes. So, you can secure every slat to the frame with two wood screws.

Under Bed Storage

There are a variety of under-bed storage solutions for this collection. You can add a storage trundle, or an under-bed dresser. Alternatively, you can add two independent and large roll-in-out drawers under this bunk bed.

Sliding Platform

Platform is made of solid hardwood. Slide is also made of solid hardwood on the sides and ends. It has this smooth surface of MDF for easy sliding. Depending on your bunk bed's entrance option, you can install the platform on the left or right hand side or on either end.

The advantage of this sliding platform is that it requires much less space with the slide connecting directly in front of the platform on end. Another advantage is that you can use one size slide platform for all bunks and loft beds in this collection.

This slide connects to the platform using metal hooks. There are two safety pieces that go over these hooks so you do not remove the slide accidentally.

Safety

This modular design hardwood bunk bed can hold a tested 400lb weight capacity on the upper deck. The lower deck can almost also hold the same weight, but we do not test the lower deck.

All sizes have center support on the upper deck except for the twin. For the lower deck, the center support is available only for XL sizes and Queen sizes.

The modular design has 4 metal pings, purpose built [Rocklocks](#) which lock the upper and lower headboards.

We use acrylic paint for the white finish. For natural and chestnut finishes we use nc lacquer (nitro cellulose). Also, we test the finishes for chemical compliance with US and EU safety standards.

Assembly

Assembly of this Modular Design hardwood bunk bed is reasonably simple. No need to assemble the headboards. You need to assemble the ladder, the guard rails, connect mattress rails, and slats. You also need to assemble the platform and the slide. The tricky bit is installing the Rocklock.

Mattress

Standard size mattress fits this bunk bed just fine. For the upper bunk, you can use a maximum 6" thick mattress. For the lower bunk, depending on which height you are going to choose, use a mattress between 6 to 8" thick.

Summary:

- Part of our Modular Design collection.
- The design allows you to modify your furniture as your needs evolve.
- Made from knot-free premium solid hardwood.
- Converts into two beds or loft with additional pieces.
- Includes bunk bed Frame, slide and platform.
- Install the sliding platform on either end.
- Solid wood slats.
- Non-toxic low VOC finish.
- Add under bed storage to maximize space saving.
