### General info

#### Solid Hardwood Loft Bed

Modular design solid hardwood loft bed with vertical ladder and curtains and slide and tent and tower is available in 51" height, three wood colors, three styles of headboards, and in two sizes of single (twin) and double (full) plus many colors for curtains and tent to choose from.

This loft bed is part of our [Modular Collection](#). The name is for the fact that loft is made of many building blocks which give you a lot of choices.

The modular design means you have zillions of options before your purchase and lots of possibilities in the future. This is because you can obtain parts and convert your loft to something else, say to two loft beds for example. This is our only collection which we sell as a whole or by pieces.

You can use our modular design loft beds for kids, teens and adults.

Made of either birch, maple, or aspen premium knot free solid [hardwood](#). You can not choose your wood type, the factory does it

## **Usability**

This loft bed divides into one individual bed or a daybed. As your child grows, you can remove the curtains and slide and add a desk and bookcase under this loft. That is, you can raise the height of your loft with additional pieces when you need to.

### **Curtains and Tower**

Price of this item includes two [Curtains](#). One piece covers the front of your loft, and the other piece covers one corner. Curtains connect to the frame with simple velcro. You can easily take them off, wash, and put them back on. Windows are see-through plastic types of material.

Curtains come in many colors and you can add matching or contrasting bolsters and pillows.

Tower is another cool piece that is part of this package. It goes over the slide.

### **Tent**

Price also includes the top tent and it is available in matching colors as the curtains. [Top tent](#) frame is the same wood and the same color as your loft bed frame. You can easily remove the fabrics for wash and reinstall.

### **Slide**

Price of this item includes the Slide which is also made of solid hardwood on the sides and ends. The smooth surface is MDF. It comes with two sturdy metal hooks so if you want to remove the slide then it is possible. There are two safety pieces that go over those hooks so you do not remove the slide accidentally.

You can install the slide on the left or right hand side.

### **Ladder**

This bunk comes with one thick and sturdy ladder. Each rung is almost 3" wide with anti slip grooves. Angled ladder versions come with metal handle bars to assist.

Vertical ladder makes the footprint very minimal.

Angle ladder with a metal handlebar makes climbing up and down very safe and easy.

### **Assembly**

Assembly of Modular Design loft bed is reasonably simple. No need to assemble the headboards. You need to assemble the ladder and connect the headboards to the legs, the guard rails, mattress rails, and slats.

### **Safety**

This solid hardwood loft bed has a rating of 400 lb weight on the upper deck. In our factory we put 800 lb weight on this loft and it holded nicely - though we recommend it to stay within the range of actual rating.

There are 4 metal pings, purpose built Rocklocks, which locks the upper headboards to lower legs so you can not pull the legs out accidentally.

### **Slats**

[Slats](#) are made of knotty solid pine wood. Each slat is 2.5" wide and 2.5" apart from each other for a total of 14 slats for single size. End slats are 4.7" each.

## Mattress

Standard size mattress fits this loft bed just fine. We recommend using a six inches thick mattress.
