### General info

---

This hardwood bunk bed is part of our [Modular Design](#) collection. It comes with a vertical ladder on end. This vertical ladder on end is a headboard entry.

Headboard is Slatted style and it is a contemporary take on the traditional mission design.

Color is in White finish and it is pure paint therefore you can not see the wood grains. You can match the white color bunk bed with any bedding or existing furniture since there is little variation in pure white color.

The overall height is 66 inches which is compatible with a standard 96" ceiling. You can split this bunk bed into two beds. Upper headboards are 31" each and lower headboards are 35" each. This means if you decide to split this bunk bed, you will get two identical beds with a High-Low look.

Size of this bunk bed is Twin over Full which is also known as single over double.

### Usability

This modular design hardwood bunk bed means you have zillions of options of use and lots of possibilities in the future. This is because you can purchase pieces individually which in turn gives you lots of flexibility.

Our modular design solid hardwood bunk bed is suitable for use by kids, teens or adults. You can divide this bunk bed into two separate beds.

## Solid Wood Frame

We use solid [hardwood](#) for this bunk bed. Our factory uses Aspen, Maple, or Birch wood interchangeably for the production of this unit. To achieve maximum strength, we use premium knot-free hardwood for this bunk bed.

Slats are made of [plywood](#). They are about 2.5" wide and 2.5" apart from each other. Each slat comes with holes. So, you can secure every slat to the frame with two wood screws.

## Under Bed Storage

You can add a storage trundle under this bunk bed, or normal trundle bed for allowing an extra mattress. Also you can add an under bed dresser or a set of two drawers. These items are independent units so you can add them later on if you choose to.

## Safety of Your Bunk Bed

This modular design hardwood bunk bed can hold a tested 400lb weight capacity on the upper deck. The lower deck can almost also hold the same weight, but we do not test the lower deck. All sizes have center support on the upper deck except for the twin. For the lower deck, the center support is available only for XL sizes and Queen sizes.

The modular design has 4 metal pings, purpose built [Rocklocks](#) which lock the upper and lower headboards.

We use acrylic paint for the white finish. For natural and chestnut finishes we use nc lacquer (nitro cellulose). Also, we test the finishes for chemical compliance with US and EU safety standards.

## Ladder

Ladder is a headboard entry. However, it is a symmetrical design and it can either go to the left or right side when installed. This means that you can change its orientation down the road if your need changes.

Vertical ladder is harder to climb but takes less space. Ladder is thick and sturdy. Each rung is almost 3" wide with anti slip grooves.

## Assembly

Assembly of this Modular design is relatively easy as you do not need to assemble the headboards. The only items you need to assemble are the ladder, guard rails, connect mattress rails, Rocklock and slats. However, installing the Rocklock is tricky.

## Mattress

Standard size mattress fits this bunk bed just fine. For the upper bunk, you can use a maximum 6" thick mattress. For the lower bunk, depending on which height you are going to choose, use a mattress between 6 to 8" thick.

## Summary:

- Part of our Modular Design collection. The design allows you to modify your furniture as your needs evolve.
- Made from knot free premium solid hardwood.
- Converts into 2 standard beds.

- Install the ladder on the left or right side.
- Plywood slats.
- Non-toxic low VOC finish.
- Add under bed storage to maximize space saving.
