Ladder

This loft comes with one thick and sturdy ladder. The angled with 3 steps and rounded edges offers safe climbing. Each rung is almost 3" wide with anti slip grooves.

No need to assemble the headboards. You need to assemble the ladder and connect the headboards to the legs, the guard rails, mattress rails, and slats.

Safety

This solid wood loft bed has a rating of 400 lb weight on the upper deck. In our factory we put 800 lb weight on this loft and it holded nicely - though we recommend it to stay within the range of actual rating.

These beds are made from Solid Wood and no inferior soft woods. They meets or exceeds federal safety standards for children's furniture.

There are 4 metal pins, purpose built Rocklocks, which locks the upper headboards to lower legs so you can not pull the legs out accidently.

Slats

[Slats](#) are made of knotty solid pine wood. Each slat is 2.5" wide and 2.5" apart from each other for a total of 14 slats for single size. End slats are 4.7" each.
